

## Online Banking Upgrade

At Kitsap Bank we strive to provide the best in products and services. An upgrade of our Online Banking services was recently completed to implement changes to improve the look and feel. Additionally, this update laid the foundation for future technology enhancements, such as Mobile Banking and e-Statement generation.

When you next login, you will notice that the screen size has been significantly increased and features have been implemented to collapse and expand information to provide additional viewing options. By simply double clicking on the desired account on the Account Overview page, you will be presented with detailed account information. When reviewing account activity, cancelled transactions will be easier to identify as they now appear with a line through them for better recognition. Additional icons and visual improvements have been implemented throughout Online Banking to increase the ease of navigation.

For customers using Quicken and Quickbooks, you will now be able to easily connect and import transaction history directly from the software application using Express Web Connect without logging in to Online Banking.

**Coming in February:** Mobile Banking - customers will be able to use a web enabled mobile phone to view accounts, balances and perform funds transfers in an easy to read format created especially for small mobile screens.

If you have any questions or concerns about Online Banking, please feel free to contact a local service representative at 360-876-3644, x7 or 800-283-5537, x7. Support is available Monday-Friday from 8am – 5pm.
